#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species:
2. Species I: drawn to a rectangular spacer, as seen in the embodiment in Figure 1.
3. Species II: drawn to a tab spacer, as seen in the embodiment in Figures 3A and 3B.
4. Species III: drawn to a spacer with a pointed indicator and a top with teeth, as seen in the embodiment in Figures 4A and 4B.
5. Species IV: drawn to a combination of a spacer with a pointed indicator and a top with teeth and a sling at least partially enclosed in a sleeve, as seen in the embodiment in Figures 4C-4E, 5, 6A and 6B.
6. Species V: drawn to a spacer with cantilever beam, as seen in the embodiment in Figures 7A and 7B.
7. Species VI: drawn to a spacer with an elongate shaft member that is flat relative to the top side of the spacer, as seen in the embodiment in Figures 8A and 8B.
8. Species VII: drawn to a spacer with an elongate shaft member bent at an angle relative to the top side of the spacer, as seen in the embodiment in Figure 9.
9. Species VIII: drawn to a spacer having a shaft, and extension and a pin, as seen in the embodiment in Figures 10A and 10B.
10. Species IX: drawn to a tubular spacer divided into two halves, as seen in the embodiment in Figures 11A-11D.

Art Unit: 3735

11. Species X: drawn to a tubular spacer divided into two halves with a truss formed by slits formed in a wall of the spacer, as seen in the embodiment in Figures 11E-11H.

12. Species XI: drawn to tubular spacer wherein both ends of the sleeves are within the same aperture of the spacer, as seen in the embodiment in Figures 2 and 12-15.

13. The species are independent or distinct because the eleven spacers have different configurations for spacing away from the sling at least a portion of a sleeve that at least partially encloses the sling.

14. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 30 and 41 are generic.

15. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

16. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Art Unit: 3735

17. A telephone call was made to Attorney Ronda P. Moore on 9/20/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

18. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

19. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

20. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

21. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 3735
